

## 14<sup>TH</sup> CONGRESS OF THE INTERNATIONAL SOCIETY OF NUTRIGENETICS AND NUTRIGENOMICS SEPTEMBER 26 -28, 2021

Considering the development of the COVID-19 pandemic around the globe, it has been decided to organise the ISNN 2021 Congress on **SEPTEMBER 26-28** as a virtual conference.

**Visit [ISNN2021.org](https://ISNN2021.org) for latest congress information, registration, abstract and poster submissions.**

The 2021 ISNN Congress will focus on cutting edge research on human metabolism and on the interaction of the human genome with the metabolome, on human chemosensing and its interactions with the genome, and on the nutrigenetics of salt sensitivity.

Numerous nationally and internationally acclaimed speakers will present. We expect attendance of nutrition researchers, clinicians, dietitians and other health care professionals and researchers from the region and from around the world. These are the leaders in the development and practice of advanced nutrition solutions.

We welcome you to exciting discussions in the ever more relevant areas of nutrigenetics, nutrigenomics, metabolome, and precision nutrition. We look forward to a great ISNN 2021 Virtual Congress!

**Martin Kohlmeier, MD PhD**  
ISNN President
