

The International Union of Nutritional Sciences (IUNS) advances nutritional science, research, and education through international collaboration. Its global priorities include addressing obesity, promoting child development, combating malnutrition, and ensuring food safety.

Dr. Zhaoping Li's research and professional contributions align strongly with the IUNS mission to advance nutritional science. Her work in precision nutrition and obesity exemplifies the importance of rigorous, individual focused research that moves beyond generalized dietary recommendations. By integrating genetics, lifestyle, health status, and individual responses to food, Dr. Li is helping to redefine how we approach nutrition. She is an experienced leader in nutrition research, education and advocacy.

Dr. Li's foremost priority is to support IUNS in its critical role of fostering international collaboration to advance nutrition research, education, and policy. Strengthening partnerships with global nutrition societies and organizations is essential to promoting cutting-edge research and translating scientific evidence into effective interventions.

As a physician-scientist, Dr. Li believes that IUNS is the leading global authority in nutrition science and policy, powered by its Adhering Bodies, expert members, and visionary leadership. She is committed to ensuring that IUNS remains a trusted voice in addressing nutritional challenges and disseminating evidence-based information.

Dr. Li also emphasizes the importance of investing in the next generation of nutrition scientists. She believes IUNS must champion the training of diverse early-career researchers through multidisciplinary approaches that connect basic science, clinical application, and community impact. This is key to ensuring that nutrition science continues to drive public health and policy innovation.

If elected, Dr. Li is committed to empowering and supporting Adhering Bodies and affiliated societies through regional congresses that address pressing issues such as precision nutrition, food insecurity, and sustainability.

Her priorities include:

- **Strengthening global collaboration** among nutrition scientists, researchers, and organizations to facilitate the sharing of knowledge, resources, and best practices for addressing global nutrition challenges.
- **Expanding representation** from all continents and countries to ensure truly global inclusion.
- **Establishing an online platform** and organizing virtual meetings to enhance communication among Adhering Bodies on global nutrition issues.
- **Leveraging IUNS's nonprofit status** to raise funds supporting students and early-career researchers through travel awards and research seed grants.
- **Promoting equitable access to nutrition** by advocating for policies and programs that reduce health disparities and improve nutrition security across the lifespan.
- **Driving innovation and discovery** by incorporating advancements in research, professional development, technology, and practice to tackle emerging nutrition and food system challenges.
- **Advocating for sustainable food systems** and consumption patterns that protect the environment and ensure food security for future generations.

Dr. Li respectfully asks for your vote to serve as President-Elect of IUNS. She is eager for the opportunity to collaborate with every Adhering Body to advance our shared mission of improving nutrition and health for all global citizens.
